

A large, stylized graphic in orange and white. It features a sun with rays on the right side and a human face on the left side, both rendered in a simple, bold, line-art style. The sun's rays extend across the top and right of the page, while the face's features are concentrated on the left. The overall composition is clean and modern.

Summer 2012 LEXPLORATIONS

Children's Summer Program
For Academic and Creative Enrichment

Lexington Community Education

A Self-Sustaining Program of the Lexington Public Schools

251 Waltham Street • Lexington, MA 02421

www.LexingtonCommunityEd.org • 781.862.8043

Welcome to LEXPLORATIONS 2012!

REGISTRATION INFORMATION

TUITION AND DEPOSIT

- A \$30 non-refundable deposit PER CLASS (applicable toward tuition) will hold your child's space until June 1, when the balance is due.
- You may choose to send only the \$30 deposit per class (per child) or the full tuition with the completed registration form.
- Grade level refers to the grade your child will enter in September, 2012.
- You may pay by check or with a Visa or MasterCard.

CANCELLATIONS, CHANGES AND WITHDRAWALS

- All money is returned if LCE cancels a class.
- A \$15 Switch Fee will be charged for each change in a child's registration.
- If you withdraw from a program at least 10 days prior to the start date, tuition will be refunded minus the \$30 non-refundable deposit.
- If you withdraw from a program less than 10 days prior to the start date, all tuition, including the deposit, will be forfeited.

SCHOLARSHIP ASSISTANCE

- Limited scholarship assistance (up to a 50% reduction/\$500 Family maximum) is available for Lexington residents. Please call for details.

CONFIRMATIONS

- Confirmations and further information will be sent in June.

PROGRAM INFORMATION

LOCATIONS

Classes will meet at Fiske Elementary School, located at 55 Adams Street in Lexington, and at Lexington High School located at 251 Waltham Street. Parents will be notified of the exact room locations in June.

DROP-OFF AND PICK-UP

The majority of Lexplorations programs meet from 9:00 am to 3:00 pm. Children should not be dropped off without an adult prior to 9:00 am. You must pick up children promptly at 3:00 pm. A late fee of \$1.00 per minute will be charged for students remaining at the school past 3:10 pm.

CLASS SIZE

- Class size is generally limited to 12–15 students, depending on age group.
- Most classes have a minimum enrollment of 6 students. We will notify you in late May if your child's program must be canceled due to under-enrollment. Students in canceled classes often find other Lexplorations programs of interest in which to enroll.
- If a program is filled, wait lists are available upon request.

PROGRAM CONTENT

Programs that repeat are the same in content unless specifically noted in the description.

Week 1	Week 2	Week 3	Week 4	Week 5

Young Yogis: Yoga and Your Healthy Lifestyle

Elizabeth Horan

If you would like to be as agile as a monkey, limber as a lemur, or supple as a cat, join us and learn how you can increase energy, optimize health, and experience greater relaxation through the practice of yoga. You will learn about your breath, muscles, bones and body, as well as a bit of the history of this ancient art. You will also discover ways to be as healthy as a hippo by understanding how food is used to make energy and build your body. Please wear loose or stretchy clothing and, if you have one, bring a yoga mat to class.

Meet & Greet the Artists

Iris Goldfarb

Travel in time through games, stories, movies and of course, making art! Working indoors and out, this class will explore the art and biographies of some of the world's most famous artists. Art projects will span a wide range of media from assembling and creating a one of a kind DaVinci flying machine, investigating the effects of light through "plein air painting", a la Monet, sewing a unique Faith Ringgold, "Tar Beach" inspired quilt and much, much more.

An American Girl Summer

Cara Dwyer/Lisa Williams

Did you know that each American Girl doll hails from a specific time and place in our nation's history? You will have fun while learning American history and about what it was like to be a child long ago. One doll and her story will be featured each day, along with related games, music, and crafts that are representative of the doll's background. You do not need to own or bring any of these dolls to join the fun. All dolls (not only American Girl dolls) are welcome to join the class!

Into the Wild

Julie Buxton Scafidi

Let your imagination run wild and come on an amazing safari through Africa with Jack Hannah as our guide! We will view videos of Jack in the wild, and explore and recreate the animals' natural habitats and learn how they live and thrive. Enjoy action packed projects such as mask making, habitat murals, large and small-scale models and paper mache animals. Jump into the wild and join our animal adventures!

Creation Stations

Elizabeth Class

Our Creation Stations will consist of a variety of arts and crafts projects ranging from short, half-day projects to multi-day activities. Some projects include designing and painting a work apron, decorating/painting bird houses, creating stepping stones, painting pots and planting flowers, making dream-catchers and sand art, decorating paper weights, creating clay sculptures, painting stained glass, and designing tie-dye t-shirts. We will complete as many activities as we can during the week while promoting creativity in design and gaining experience using creative materials.

Chemistry In The Kitchen & Literature And Crafts

Charlotte Graham & Callie Graham

This week will give you the chance to explore and develop skills in the unique areas of both science and literature. For half the day we will experiment with safe chemicals that are commonly found in the kitchen. We will blend our kitchen chemistry with math, art, language, and music activities. During the second half of the day we will explore the adventure offered in the language of story, and work toward developing and improving the basic skills necessary to read well. Each day our imagination, creativity, and stories will come alive through arts and crafts projects.

Adventures with Ms. Frizzle

Kaitlin Boudreau

Hop on board the *Magic School Bus* to explore various science topics such as Bugs, the Human Body, and even Outer Space! Each day we will travel through a different *Magic School Bus* book, learn about the topic, create crafts, and dig deeper into Ms. Frizzle's exciting learning adventures. We may even re-create a science experiment to learn more about Ms. Frizzle's favorite topics.

July 23 – July 27	\$275	code: 4BUS
July 30 – August 3	\$275	code: 5BUS

Getting Silly with Dr. Seuss

Dani Turner

Come get silly with the one and only Dr. Seuss! Each day we will learn and explore popular Dr. Seuss stories. Books will be turned into plays for an exciting reader's theatre filled with nonsense words, rhyming and laughter. Craft activities that correlate with popular Seuss stories will help transform us into his characters. We will also create and publish our very own silly rhyming story. In-class and on-line games will allow us to further explore Seuss's famous way with words. Join us for a week filled with exploration, imagination, learning and fun.

Young Yogis: Yoga and Your Healthy Lifestyle Grades 2–3

Elizabeth Horan

Fiske

This week you will learn about your bones, muscles, breath, and body through studying and practicing the ancient art and science of yoga. You will begin by working on foundational yoga poses and sequences (like the sun salutation) and then create personal additions and adaptations. We will also practice meditation, learn about proper nutrition, discover ways to increase energy and optimize health and learn some great tools for peaceful, quiet times. Please wear loose or stretchy clothing and, if you have one, bring a yoga mat to class.

July 9 – July 13 \$275 code: 2YOGA
 July 30 – August 3 \$275 code: 5YOGA

Fun with 3-D Art

Susan Bottan

Grades 2–4

Fiske

What can you create with recycled materials, found objects, wire, wood, paper mache, paint, cardboard, clay, and ... a bar of soap? Let's find out! This fun, interactive, and hands-on class will introduce you to 3-D art. Learn about and become inspired by the works of important 20th century sculptors including Louise Nevelson and Alexander Calder. Experiment with all sorts of familiar and uncommon materials. Create and construct your own original and unique sculptures guided by the elements and principles of art. Discover new ways of expressing yourself. Bring along your imagination and be prepared to have fun!

July 2 – July 6 \$220 code: 13D

Tree House Adventures

Sonny Wilde

Grades 2–4

Fiske

Get swept up in the adventures of the popular *Magic Tree House* series. Whether you are already a fan, or would like to read some of these stories for the first time, come join other readers as we explore some favorite *Magic Tree House* stories. We'll read alone and with partners, act out exciting scenes, and listen to the author read on CD. We'll make our own miniature magic tree houses or other crafts based on some of the book settings. We'll write our own new adventures for Jack and Annie, and create a board game based on their exploits. Come and join the fun!

July 2 – July 6 \$220 code: 1TREE
 July 23 – July 27 \$275 code: 4TREE

Improvisation Explorations

Kelly Bassett

Grades 3–4

Fiske

In this introduction to improvisation and the dramatic arts we will look at the world through an artistic lens and see things in an interactive and uniquely interpretive light. You'll develop listening skills and improvising techniques as we work in small groups to create scenes (complete with props and costumes), and perform for classmates and families. Discover strength and talent that you never knew you had! No acting experience necessary.

July 23 – July 27 \$275 code: 4IMPROV

Summer Science Challenge!

Chris Cavatorta

Grades 3–4

Fiske

Inspired by the PBS children's program *Design Squad* and the book *Howtoons*, this course will challenge your critical thinking skills and allow you to make practical, hands-on science projects. From creating the strongest bridge to attempting to launch a water balloon, each day will present an exciting engineering challenge. Our mornings will be dedicated to learning about the challenge, brainstorming and mapping out real-world solutions. During the second half of the day we will construct our solution and see how successful our squad was in meeting the challenge.

July 16 – July 20 \$275 code: 3SUMCSI

Lexplorations POP Sensations!

Amanda Turkanis

Grades 3–4

Fiske

Do you dream of becoming a pop star, or starring in your own music video? We will explore dance styles including ballet, jazz, tap, hip-hop and acrobatics as you learn the dances from your favorite popular movies, videos and songs. We'll have the opportunity to watch and learn from dance videos, practice different dance styles and share stories about dance and games involving dance. A little acting, writing and singing will complement the dance moves you learn. A highlight of the week will be a dance performance for other Lexplorations students. No dance background or equipment is necessary, however, students who have previous dance experience will be welcome to share their moves!

July 30 – August 3 \$275 code: 5POP

Math Mania

Gail Grimes

Grades 3–4

Fiske

Sharpen your math skills while having tons of fun! We will spend part of the day playing math games — individually, with partners, and in small and large groups. Games will cover all the strands of mathematics—number sense and operations, patterns and relations, geometry, measurement, data analysis, and probability. Games include Operation Space Chase, Dino Math Tracks Place-Value Game, Loose Change, X From Outer Space, Whip Around, Snap It Up, Blink, The Allowance Game, Arithmechips, Zeus on the Loose, and more! We will spend the other part of the day creating and constructing our own math board games and card decks.

July 16 – July 20 \$275 code: 3MANIA
 July 23 – July 27 \$275 code: 4MANIA

Code Breakers

Sonny Wilde

Grades 3–4

Fiske

Humans have used secret codes for private communications for thousands of years. This week you will learn the logic in creating codes, techniques to decipher them, and how to invent your own private code. You will even try your hand at Braille (the 3D code for reading) and learn some sign language! There are so many ways to communicate including pictographs, Morse code, spoken language, and number codes. You will try brainteasers, treasure hunts, code breaking, and code making! *Isthay assclay illway ostlay oway fay unfay orfay ouyay andway ouryay iendsfray!*

July 9 – July 13 \$275 code: 2CODE

Japanese Crafts for Kids

Dawn Mostow-Gould

Grades 3–5

Fiske

With its celebration of all things cute and colorful, Japan could easily be seen as a children's paradise! Learn all about what it's like to grow up in Japan and experience the cultural holidays with crafts geared specifically for kids. You will paint paper umbrellas, fans, and lanterns, fold amazing origami creations, and make brilliantly colored carp banners. You will learn to write your name in Japanese and then paint it on a picture scroll. We will look at real toys and crafts from Japan such as paper balloons and children's kimonos and learn to speak some very important phrases in Japanese. Join us on this trip to the Land of the Rising Sun! Students will enjoy the film *My Neighbor Totoro* that portrays daily life in Japan through the eyes of a child.

July 9 – July 13 \$275 code: 2JAPAN
 July 30 – August 3 \$275 code: 5JAPAN

Krazy Kritters

Cathy Cote

Learn to make stuffed animals, both ordinary and extra-ordinary! If you can imagine it and draw it you can create it. You will start by turning a pair of socks into a stuffed dog, and learning in the process how to cut material, thread a needle and sew basic stitches by hand. You will then learn how to take your own drawings and make patterns to create 3D versions of the pictures. Using a variety of materials, you can sew and/or glue together the stuffed buddy of your dreams.

Get Creative

Jessie Steigerwald and Fay Backert

Where do good ideas come from? How do inventors and artists get a creative spark to begin a new project? What's it like to collaborate with other creative people? Creative thinking and teamwork are the keys to a fun summer. How tall can you build a house of cards? Can you use the same cards to create a costume? Using improvisational theater games, building and design challenges, music and more, you'll laugh a lot, make new friends, and stretch your mind.

Junior Journalists

Neil Taylor

Extra! Extra! Calling young journalists! Join us for a week of writing and publishing. We'll create our own magazine filled with articles, games, puzzles, photographs, and illustrations. Learn how newspapers and magazines are published, then choose one of many possible assignments in investigative journalism, and get started. You'll use computers and learn about advanced layout and publishing features. At the end of each week, we'll print a jam-packed, stylish magazine based on your creative writing and design ideas.

Lights, Camera, Action!

Karen Hall

Have you ever wished you could create and star in your own TV show? Now you can! Working together with a small group of student directors, producers, editors and actors, you'll use Mac laptops and software such as Photo Booth, iMovie, and Garage Band to write, film, edit, and produce your show. Whether you choose to make a talk show, news program, comedy show, travel program, or something else entirely, you'll have lots of fun and learn some fantastic technology skills. You'll go home with a DVD to share with your family and friends starring YOU!

July 2 – July 6 \$220 code: 1LIGHTS
 July 16 – July 20 \$275 code: 3LIGHTS

Grades 4–6

Puzzled

Jennifer Kuhn

Use your critical thinking skills to solve different kinds of puzzles while you work individually and in groups. We will focus on a different theme of puzzles, learn how the puzzles work, and discover strategies to solve them. You'll explore some of the many puzzles that will be available in the room. On the last day, students will have a chance to create their own puzzles for their friends and families to solve. We will investigate Jigsaw Puzzles, Word/Letter Puzzles, Math/Logic Puzzles and 3D Puzzles.

July 9 – July 13 \$275 code: 2PUZZ

Invention Convention

Kyle Tompkins

Do you like to construct things with your hands and solve everyday challenges? Do you like to think "outside the box" to make things more efficient? If you do, this class is perfect for you! You will be given a problem (or find one of your own) and use your creativity and problem-solving skills to brainstorm, design, and invent a solution-based product. Learn about different inventions, and the steps inventors follow to make life easier. You will work both individually and in small groups to respond to the challenge of the day. An example of one challenge might be, "Work with a partner to design, build, test, and improve cars powered by inflated balloons." After creating their inventions, you will have opportunities to compare and test them against other students in the class.

Crochet, Buttons, and Beads

Christine McMahon

Get your fingers ready and bring your imagination! Make projects out of yarn, buttons and beads. You'll start by learning and practicing the basic stitches of crocheting. Once you know the basic stitches, you can crochet an endless number of projects, such as scarves, hats, and even animals. We will view some short clips online to help you get an up-close look at the ins and outs of the crocheting process. Throughout the week, you will also use buttons and beads to make necklaces, bracelets, key chains, and more.

July 30 – August 3 \$275 code: 5CROCHET

Geo*Art

Gerry Goolkasian

If you enjoy art and computer games then join us for a fun and action-packed week solving visual puzzles using exciting computer games. Draw original full-color geometric creations including fantasy architecture and amusement parks. You will use painting and drawing software to design beautiful fractals and more. You will also enjoy figuring out all the angles as you play in our daily miniature golf tournament on the computer.

July 16 – July 20 \$275 code: 3GEO

Dungeons & Dragons

Gerry Goolkasian

Newcomers and experts alike will play this fun and very popular game and also develop related illustrations that grow out of their D & D game experiences. Whatever your level of artistic ability, you will receive the art instruction and assistance needed to bring your D & D characters and adventures to life with computer graphics.

July 2 – July 6 \$220 code: 1DANDD
July 23 – July 27 \$275 code: 4DANDD
July 30 – August 3 \$275 code: 5DANDD

Dungeons & Dragons and Magic

Gerry Goolkasian

Newcomers and experts alike will play the fun and very popular game of Dungeons & Dragons. You will invent a “character” that comes to life while taking part in imaginary adventures that take you through new lands and experiences with those in your “campaign.” Students interested in playing Magic cards will also have the option to experience playing with other Magic enthusiasts for part of each day. Please bring your own Magic cards.

July 9 – July 13 \$275 code: 2MD&D

Percy Jackson and the Heroes of Olympus

Brenda Rich

Explore the world of Greek (and some Roman) mythology that is at the heart of the *Percy Jackson* and *The Heroes of Olympus* series. Meet the characters and their “relatives” as well as the Gods, Goddesses, Heroes and Heroines, Monsters and Demons in Greek and Roman mythology. After reading some myths and of the adventure of the kids from Camp Half-Blood we will use our research to create a newspaper highlighting the characters in the series. We will also create artwork, play “Greek games”, test our knowledge of the series and its characters and much more.

July 9–13 \$275 code: 2PERCY

Projects in Clay

Rachel Durocher

Students will use the ceramic techniques of pinching and coiling to create individual projects in clay. Themes could include: finger puppets, creatures of the deep sea, my new pet, and once upon a time. Students will use lead-free glazes to add surface decoration to their work. This program is held in the LHS pottery studio. Tuition is slightly higher for this program because of increased materials expenses.

Programming with Legos & Lego Mindstorms

Matthew Studley

Do you like to design extravagant structures and patterns? Do you enjoy working with colors, patterns and shapes? If so, join our ‘Learning with Legos & LEGO Mindstorms’ summer series at Lexplorations. This summer we will brainstorm, design, and create LEGO animals, buildings, bridges, towers, ships, statues and castles. We will also create and program various structures using the LEGO Mindstorms RCX Technology. You will also have a pictorial cd-rom of your creations to take home.

July 9 – July 13 \$275 code: 2LEGOS
July 16 – July 20 \$275 code: 3LEGOS
July 23 – July 27 \$275 code: 4LEGOS

Intro to Scratch

Julie Sellhub

Learn this user-friendly programming tool that uses color coded commands and background and image templates to provide a project springboard. We will start by viewing projects created by other students as an introduction to sound, picture, and animation possibilities. Through “skill card” activities and small projects, you will learn the basics from the instructor and, as the week progresses, share with each other the techniques and skills you have learned. Each day will provide time for individual creation as well as group sharing and demonstrations.

July 9 – July 13 \$275 code: 2SCRATCH
July 23 – July 27 \$275 code: 4SCRATCH

Advanced Legos: Autonomous Robots

Roger Pachter

Join members of FIRST Lego League robotics team, the Battery Powered Picklejar Heads, and learn advanced robot design techniques such as using touch and optical sensors in closed loop control algorithms, ways to methodically develop complex technical designs as a team and the delights of scientific and engineering competition. Short talks on technique will be followed by hands-on designing, programming and testing Lego Mindstorm robots. If you love a great challenge, want to work hard and learn how to build a winning team please join us. No previous Lego Mindstorm experience necessary, just a passion to learn!

This is a ½ day class and will meet from 12:00noon –3:00pm
July 30 – August 3 \$160 code: 5LEGO

Singapalooza

Sandy Lewis

If you like to sing, this is the program for you! Singapalooza is back with another summer of soaring voices. Bring your voice, your enthusiasm, and begin to practice as soon as we begin class. We start the week by singing in groups, to help with any nervousness. Based on past years, it is not long before students are singing alone, and loving it! Bring your favorite songs on your iPod or other MP3 player, and listen to the songs as you practice singing. If you don't have an iPod, Lexplorations staff will help you find appropriate music and lyrics online. At the end of the week, you'll record your singing and burn it onto a CD, and we may put on a performance for the other programs.

July 9 – July 13 \$275 code: 2SING

Grade level refers to the grade your child will enter in September, 2012.

UPPER eLEmentary and MIDDLE SCHOOL

Acting with iMovie

Dianne DeChellis

Learn the art of acting in front of the camera, and take part in the creative technical work that takes place behind it! We will write original sitcom skits and commercials, act in short scenes, and edit our work and use tools on iMovie. For each project, students can choose to act, direct, or use the camera. You don't need to act to enjoy this class, as there is fun to be had with writing funny scenes and using iMovie. *Watching commercial ads such as toothpaste or food will be viewed as examples. In addition, you will watch 1-2 episodes of an 80's TV sitcom such as *Family Ties* or *Who's the Boss*.

Make a Scene:

Writing, Directing, & Acting

John Chamberlain

Do you love theatre? Making a scene can be a creative experience. We will read some examples first. Then students will invent characters, giving them attributes, putting them in situations and scenes, and seeing what happens as they design dialogue and actions. Then we will present or enact them as scripts and skits. In a number of settings, we will explore characters' appearances, interactions and intentions, be they comical, villainous, foiling, guiding, or heroic. Feedback and encouragement will be given.

Fiction Writing I

Jane Buchbinder

Explore the fundamentals of fiction writing: character, plot, setting, and dialogue. Engaging daily prompts and exercises will bring us into the flow of writing. We'll write to music, and find inspiration in visual images. We'll zoom in on life's ordinary details, and discover the quirkiness that is all around us. We'll also learn how to positively and constructively "workshop"—that is, critique—one another's writing. Each evening at home, students will read from a course pack of published student writers, as well as established multi-cultural voices, to learn the building blocks of great writing from those who are already bringing stories to life. **This is a ½ day class and will meet from 12:00noon – 3:00pm**
